

ACCELERATE YOUR CAREER

During the past ten years, we have tested several approaches to leveraging knowledge while being a student. What we have experienced is that **building and running a business while studying is one of the absolute best ways to compound knowledge** - because of the combination of theoretical and practical exercises – both of which are key elements in learning.

We believe that the greatest learning comes by doing and through hands-on experience. Thus, we provide our Student Founders with **mentorship** and guidance through the journey, which means that we hold a reactive role to let the full ownership and responsibility stay within each team. During the journey, we will assist by arranging workshops across all of our portfolio companies together occasional check-ups.

As a student, you have limited responsibilities and commitments both professionally and economically. This makes up for a **unique opportunity to push your boundaries** and leverage your learnings while standing greatly out from the masses by the demonstration of drive, proactivity and versatile skills that comes through entrepreneurship. Based on experience and know-how from the Student Founders network, members receive sparring, best-practices and assistance in building and running to make sure that we leverage learnings and results in the best way – all to leave the greatest possible impact on the given industry
